

## Microsoft Dynamics 365 Business Central

As an entrepreneur, you've probably heard of an ERP system. An ERP system such as Business Central supports all your business processes. As a result, you and your employees will work more efficiently, and you will be able to make better decisions, allowing your organization to grow further.

With Business Central, you can increase financial visibility, optimize your supply chain, boost sales, improve service delivery, and keep projects on track and budget. Thanks to the online environment, you can achieve the same user experience everywhere and take things with you on the go with a recognizable, user-friendly, and intuitive way to work on Windows, Android, or iOS devices for mobile access to Business Central.

## NAV 2018 vs. Business Central

Business Central is the successor to what was previously known as Dynamics NAV. Both systems generally perform the same functionalities. The big difference is that Business Central is completely cloud-based. As a result, your system is constantly updated. In addition, BC is now more accessible for small businesses to interpret. This is mainly due to the lower costs and the easy way Business Central knows to grow with your company.

## Benefits of Dynamics 365 Business Central

Business Central has already been embraced by many small and medium-sized organizations worldwide. Below, you can read about the main benefits of BC.

### Work more efficiently

Business Central is an ERP solution that effectively links your company's applications. The software ensures precise operation, provides a 360-degree view of all your intricate details, and allows you to make better and faster decisions.

1,562.00 global users

### Secure in the cloud

Business Central is available as software in the cloud. You can access your software from anywhere and any device via the Internet. Software in the cloud is a simple solution to avoid mandatory updates. Business Central automatically receives updates based on the latest techniques, standards, and legislation. In addition, using the cloud reduces unplanned downtime by 98%.

40% improvement in finances

### Expand features easily

A critical advantage of Business Central is that the system can be expanded to your needs. Do you need a particular additional feature? You download an app from AppSource. In addition, you can easily add users to the new system so that you only pay for employees who use Business Central.

## Additional functionalities

Business Central is a SaaS solution, which means you decide what you need. As a result, you won't be unnecessarily stuck with things you don't use. Partners and specialists worldwide develop various functionalities they offer in an extension, which you can use with the standard Business Central application. These extensions are easy to download from the AppSource. In principle, you can purchase an app without consulting your service partner first, although this is always advisable. Bluace has all the necessary knowledge of the apps and ensures that your environment continues to work correctly.

## We are Bluace

Bluace offers total solutions to administer and optimize all business processes. Our consultants regularly say, "Software should support business processes, no more and no less." We advise you on how software can seamlessly connect to current work processes and are happy to collaborate with you to make your business processes more efficient.
